Nordic medac Grant

Medac introduces a grant to encourage urothelial cancer research in the Nordic countries

Medac's intention with this grant is to support Nordic resident physicians and/or specialists within urology with interest in research and development. Applications will be evaluated by a reviewing committee, consisting of members from NORdic uroTHElial cancer REsearch Group - NORTH-REG and medac.

Resident physicians or specialist physicians within urology working in Sweden, Norway, Denmark, Iceland or Finland are eligible to apply for the grant.

The grant of 10 000 Euro is applicable to the following intent:

- **Research and development** in urothelial cancer focusing on bladder and upper urinary tract
- **Courses, trainings, relevant site visits** with focus on urothelial cancer

Funds will be distributed to one or two applicants appointed by the reviewing committee. Projects involving more than one of the Nordic countries will be prioritized.

You find the application form on NORTH-REG's website, www.north-reg.nu
Application deadline is **1st of September 2021**.

Grants will be announced during Talvipäivät in Finland 2022.
